These wigs are made from real human hair and they need to be re-styled like real hair after washing and conditioning

Our Monofilament Top Wigs

The cap construction of our monofilament wig is constructed with a fine layer of transparent micro-mesh which is inserted either at the parting, crown or the top area. Each strand of hair has been individually hand tied to the mesh, to mimic natural hair growth. Some of the wigs are fully handtied on stretch lace and others are partially machine sewn with weft layers at the back. Both caps are light weighted and allow air ventilation to the scalp.
